5.2.0.13

| Patient data   |                | Ultrasound data  |              |                                 |
|--|----------------|--|--------------|---------------------------------|
| Name   | MRS. RUKSAR    | Gestational age at sample date   | 12 + 6       |                                 |
| Birthday   | 28/12/1996     | Method   | CRL Robinson |                                 |
| Age at sample date   | 28.4           | Scan date  | 11/05/2025   |                                 |
| Patient ID   | 2505024809/NOD |  |              |                                 |
| Correction factors   |                |  |              |                                 |
| Fetuses  | 1              | IVF  | no           | Previous trisomy 21 pregnancies |
| Weight in kg   | 61             | diabetes   | no           |                                 |
| Smoker   | no             | Origin   | Asian        |                                 |
| Pregnancy data   |                | Parameter  | Value        | Corr. MoM                       |
| Sample Date  | 13/05/2025     | PAPP-A   | 11.5mIU/ml   | 2.55                            |
|  |                | fb-hCG   | 91.3 ng/ml   | 2.13                            |
| Risks at sampling date   |                |  |              |                                 |
| Age risk at sampling date  | 1:778          | Trisomy 21   | 1:2850       |                                 |
| Overall population risk  | 1:600          | Trisomy 13/18  | <1:10000     |                                 |
| Risk   |                | Trisomy 21   |              |                                 |
|  |                | <p><b>The calculated risk for Trisomy 21 is below the cut off which represents a low risk.</b></p> <p>After the result of the Trisomy 21 test it is expected that among 2850 women with the same data, there is one woman with a trisomy 21 pregnancy and 2849 women with not affected pregnancies.</p> <p>The PAPP-A level is high.</p> <p>The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician.</p> <p>Please note that risk calculations are statistical approaches and have no diagnostic value!</p> |              |                                 |
| Trisomy 13/18  |                |  |              |                                 |
| <p><b>The calculated risk for trisomy 13/18 is &lt; 1:10000, which indicates a low risk.</b></p> |                |  |              |                                 |
