DEPARTMENT OF IMMUNOLOGY - SEROLOGY

ANTENATAL PROFILE BASIC

Test Name	Result	Unit	Bio. Ref. Range	Method
-----------	--------	------	-----------------	--------

Syphilis Antibody Rapid Test

Sample Type : Serum

Syphilis Antibody	NEGATIVE		Negative Positive	Immunochromatography
-------------------	----------	--	----------------------	----------------------

Comments:

* This test is alternative to VDRL or RPR.

* The test method is rapid card test , based on Immunochromatography and is done according to the Manufacturer's kit insert instructions.

Interpretation:-

1. It is a qualitative screening test for syphilis which is useful for following the progression of disease and response to therapy.
2. Biological false positive reactions exhibit low titers and are seen in conditions like Viral fevers, Mycoplasma infection, Chlamydia infection, Malaria, Immunizations, Pregnancy, Autoimmune disorders & past history of Treponemal infection.
3. It is advisable to confirm the diagnosis by tests such as TPHA & FTA-ABS.
4. A definitive clinical diagnosis should not be made by result of a single test only, but should be made by taking clinical history and other laboratory findings in to account.

*** End Of Report ***

Clinical Correlation

If there is any issue/query contact the Laboratory.

Test results are not valid for medicolegal purpose
