

Name : MR. PRADEEP  
Sex/Age : Male

## CHROMOSOME ANALYSIS

Specimen : Sample quality is optimum for the test.

### CYTOGENETICS REPORT

|                     |      |                    |                         |
|---------------------|------|--------------------|-------------------------|
| METAPHASES COUNTED  | : 30 | CULTURE TYPE       | : 72 HRS PHA STIMULATED |
| METAPHASES ANALYZED | : 30 | BANDING TECHNIQUE  | : GTG                   |
| METAPHASES          | : 30 | BANDING RESOLUTION | : 400                   |

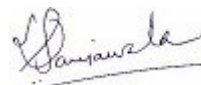

KARYOTYPED

### RESULTS

KARYOTYPE : [46,XY](#)

COMMENTS : The karyotype report is enclosed herewith and is [normal](#).

We examined the metaphases for any structural or numerical chromosomal abnormalities. We found no evidence of such defects in the metaphases. The metaphases showed normal and uniform patterns across the sample.

Name : MR. PRADEEP

Sex/Age : Male

The blood culture was set in Karyomax (Gibco, USA) for 72 hours.

Leucocyte culture metaphase karyotype: G'banding

2400149872
