Name : MR. PRADEEP Sex/Age : Male/26 Years

CHROMOSOME ANALYSIS

Specimen : Sample quality is optimum for the test.

CYTOGENETICS REPORT

METAPHASES COUNTED	: 30	CULTURE TYPE	: 72 HRS PHA STIMULATED
METAPHASES ANALYZED	: 30	BANDING TECHNIQUE	: GTG
METAPHASES	: 30	BANDING RESOLUTION	: 400
KARYOTYPED			

RESULTS

KARYOTYPE	:	<u>46,XY</u>
COMMENTS	:	The karyotype report is enclosed herewith and is normal.
		We examined the metaphases for any structural or numerical chromosomal abnormalities. We found no evidence of such defects in the metaphases. The metaphases showed normal and uniform patterns across the sample.
