Test Name	Result	Status	Unit	Bio. Ref. Range	Method
-----------	--------	--------	------	-----------------	--------

**ALLERGY COMPREHENSIVE PROFILE**

**SAMPLE TYPE : SERUM**

Total IgE	14.34		IU/ml	0-158.0	Chemiluminescence Immuno Assay
-----------	-------	--	-------	---------	--------------------------------

**Allergy Profile Complete**

**\* INTERPRETATION:-**

Having a quantitative Total IgE test result when investigating patients with suspected allergy opens up important new possibilities. Together with the medical history and a physical examination, you will be able to plan the best possible treatment. In some cases, you may even rule out allergy as the cause and thereby reducing worry and unnecessary food avoidance ! The measurement of allergen specific IgE antibodies in serum is of similar diagnostic value as that of skin tests but has a much higher reproducibility and is not influenced by ongoing symptoms or treatment.
