ALLERGY PANEL

Allergy is your body's reaction to things like pollen, animal hair, dust, certain medicines etc. They are usually harmless to others. These things which cause allergic reactions are called allergens.

Allergy Panel Legend

Allergy levels are based on the concentration of specific allergens in your system. Values below **0.35** are considered Normal (N), while values above **0.35** indicate a High (H) allergic reaction

Recommended Action Plan

Carry Emergency Medication

Due to allergies to Acacia Arabica, Cannabis Sativa, Chenopodium Album, Artemisia scoparia, Xanthium Stermarlu, always carry epinephrine auto-injector and antihistamines

Consult with Allergist

Schedule an appointment with an allergist for a comprehensive management plan and potentially immunotherapy options.

Food Challenge Test

Consider a supervised food challenge test for Acacia Arabica to confirm the severity of moderate sensitivity.

Nutrition Consultation

Meet with a dietitian to create a balanced meal plan that safely avoids your allergens while maintaining proper nutrition.

Diet and Lifestyle Tips

Avoid exposure to things you might have an allergic reaction to

In case of an allergic reaction, consult your doctor to find out the right medicines to relieve your symptoms.

Get blood tests like allergen specific IgE test done to find out specific things you might be sensitive to.

There are certain treatments like immunotherapy where you are given mild exposure to allergens and then gradually increase to a point where the reaction isn't that bad.
